

# The Noyo Harbor Blue Economy Visioning, Resiliency, and Implementation (BEVRI) Plan

City of Fort Bragg | California Sea Grant | Noyo Harbor District

Funded by the California Coastal Commission

# Overview of the BEVRI Plan

The **goal** of the plan is to create a roadmap for coastal resiliency that balances environmental stewardship with economic vitality.

Methods: site-specific technical studies and community engagement

Timeframe: 2 years for planning, 1 year for implementation

The desired **outcomes** are to identify:

- 1) blue economy opportunities and limitations;
- 2) mitigation, adaptation, and resiliency measures;
- 3) and a suite of potential projects, partners, and funding mechanisms for implementation.

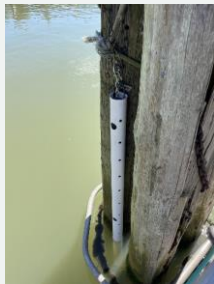

Findings will inform updates to the City of Fort Bragg and County of Mendocino Local Coastal Programs.

# The Planning Process

## Technical Studies:

- Sea Level Rise, Tsunami Hazards, and Erosion Resilience Strategy for Noyo Harbor
- Aquaculture Feasibility Study, including water quality analysis (in partnership with the Noyo Center for Marine Science)
- Special District Analysis
- Harbor Facilities Conditions Assessment
- Parcel Inventory and Land Use Assessment

## Community Engagement Initiatives:

- Monthly Community Update meetings
- [www.NoyoOceanCollective.org](http://www.NoyoOceanCollective.org)
- Facebook and Instagram
- Surveys (7), focus groups, listening sessions, and interviews
- Presenting at community meetings and events
- E-Newsletters
- Workshops
