I would like to state my concern that this resolution is missing a key factor. Innocent human life should be preserved as much as possible. This resolution however makes no mention to the fact that Hamas broke an already existing cease-fire on October 7 when it's militants killed over 1000 innocent Israelis who were just waking up in their homes on October 7, and hundreds at a music festival. That is what started this war, and it's very important to mention that in the resolution, since there already was a cease-fire in existence.
