Hello City Councilors and staff,

The REN—Regional Energy Network is a terrific idea and I encourage the Council to do this. The GRI Climate Crisis Group has discussed this with our Supervisor Dan Gjerde. It will be very advantageous for Fort Bragg, both financially and moving forward as we apply for grants in the transition to a renewable energy based economy. Bay Area communities are already taking advantage of this new way of designing regional approaches to the climate crisis.

Many thanks,

George Reinhardt
