Subject: Agenda Item 7E, SB 1 Priority Projects List

Dear Council Members:

I am writing to urge you to reject the particular project on Maple Street between Harold and Lincoln that has been identified by staff as the SB1

Priority Project. SB1 funds can be and have been used for traditional maintenance activities and there are many streets and alleys in greater need of repair than the sole project identified. It would seem more prudent to spread the available funds throughout the city rather than on one, isolated project.

Further, if the City is trying to foster transparency and trust with the community, this particular location bordering the former City Manager's property, runs counter to that objective. While the location may be a simple coincidence, it should be disclosed to the public.

Thank you for your consideration.
