SPECIAL CONDITIONS

1. A breeding bird survey is required if the special event is held after February 15th and prior to September 1st to ensure compliance with Fish and Game Code sections 3503 and 3503.5. The Bird survey will be conducted by a qualified biologist. The survey must occur no more than 7 days prior to the start of music event-related activities and should include areas within 300 feet of the Event Area. If occupied nests are observed during the survey, the biologist would establish a "no disturbance buffer" surrounding the active nest, and project-related activities in the buffer zone would be prohibited until any young present have fledged. The buffer distance shall be established by the biologist based on factors such as the species observed, the type of adjacent disturbance, and the sensitivity of the nesting bird to disturbance.

2. If the special event is held after February 15th and prior to September 1st following components should be included in any live music event conducted in the Event Area:

- Structures associated with the events should be placed at least 300 feet from the cormorant nest, as illustrated in the image below, to avoid visual and auditory disturbance.
- The stage and speakers should be located within a walled tent to reduce visual and auditory disturbance.
- Sound producing equipment should be pointed to the east/southeast which is away from the rookery site.
- Sound reduction/buffering structures should be placed along the south and west perimeter of the tent, or where appropriate, to reduce sound in the direction of the rookery.
- The stage and associated event structures should be placed as far as feasible from the coastal cliffs.

- **Alternative to Special Conditions 1 & 2:** Events on the Coastal Trail which include amplified music and/or tents of more than 250 SF may occur only between September 1 and February 15th to avoid the bird breeding season.
3. If an event requires additional vegetation to be mowed or grubbed between February 15th and prior to September 1st (beyond that which is currently mowed by the City), a breeding bird survey shall be conducted by a qualified biologist. The survey would need to occur no more than 7 days prior to the vegetation removal or mowing related and should include areas within 300 feet of the activity. If occupied nests are observed during the survey, the biologist would establish a “no disturbance buffer” surrounding the active nest, and project-related activities in the buffer zone would be prohibited until any young present have fledged. The buffer distance would be

established by the biologist based on factors such as the species observed, type of adjacent disturbance, and sensitivity of the nesting bird to disturbance.

4. Event tents on the coastal trail shall not be erected for longer than a 14-day period.
5. Events on the coastal trail will direct event attendees to park on the runway, to reserve parking for Coastal Trail visitors. Events shall not block or charge for public access to the coastal trail, coastal trail parking lot, bathrooms, picnic tables, open fields etc. with signage or any other markings or materials. Applicants can only charge for access to the event itself.
