1. Locate the optional extended sill, if provided, and place in the opening. **(Extended Sill Details)**
2. Locate mounting angles and fasteners required to attach the louver to the structure. Clip angles and fasteners are by others unless the optional mounting angles and fasteners are specified. Anchors to the structure are by others and are not manufacturer provided. **(Mounting Clip Details)**
3. Place the louver in the opening and shim around the perimeter to maintain proper spacing for backer rod and caulk joint.
4. Using the appropriate fasteners, secure the mounting angles to the back of the louver frame at the perimeter.
5. Ensure the louver is level and in the correct location within the opening and secure the mounting angles to the building substrate material.
6. Once the louver is secured to the structure, install backer rod and caulk around the perimeter of the opening at the front of the louver.
