## **TREASURER'S REPORT**

**March 31, 2026**

**OVERVIEW**

The City's investment objectives in order of priority are to provide safety, ensure the preservation of capital, provide sufficient liquidity for cash needs and earn a competitive rate of return (yield) within the confines of the California Government Code and the City Investment Policy.

- **Safety** – Safety of principal is the foremost objective of the investment program. Investments for the City will be made in a manner that seeks to ensure the preservation of capital in the overall Portfolio.
- **Liquidity** – The City's investment portfolio will remain sufficiently liquid to enable the City to meet all operating requirements, which might be reasonably anticipated.
- **Yield** – The City's investment portfolio shall be designed with the objective of attaining a market rate of return throughout the budgetary and economic cycles, taking into account the investment risk constraints, liquidity needs, and cash flow characteristics of the Portfolio.

To view the City's Investment and Fiscal policy, refer to the City's Annual Budget.

Reports on the City's investment portfolio and cash position are developed by the Finance Director/City Treasurer and reviewed by the Finance & Administration Committee quarterly.

California statutes authorize cities to invest idle or surplus funds in a variety of credit instruments as provided for in the California Government Code, Section 53600, Chapter 4 – Financial Affairs. The table below identifies the investment types that are authorized for the City by the California Government Code (or the City's investment policy, where more restrictive) that address interest rate risk, credit risk, and concentration of credit risk. During the quarter ended, the City's permissible investments included the following instruments:
