

## **CITY OF FORT BRAGG**

*Incorporated August 5, 1889*  
416 North Franklin Street  
Fort Bragg, California 95437  
tel. 707.961.2823  
fax. 707.961.2802  
[www.fortbragg.com](http://www.fortbragg.com)

### **1. PROJECT TITLE**

Local Coastal Program Amendment – Land Use Designation and Zoning Change at 100 East Ocean View Drive

### **2. LEAD AGENCY NAME AND ADDRESS**

City of Fort Bragg  
416 North Franklin Street  
Fort Bragg, CA 95437  
707-961-2823

### **3. CONTACT PERSON AND PHONE NO.**

Scott Perkins  
Associate Planner  
Community Development Department  
707-961-2827 ext. 113

### **4. PROJECT LOCATION**

The southeast corner of the intersection of South Main Street and East Ocean View Drive in Fort Bragg. See **Figure 1 (Location Map)**.

### **5. PROJECT SPONSOR'S NAME AND ADDRESS**

Riverview Building, LLC  
P.O. Box 1138  
Fort Bragg, California 95437

### **6. GENERAL PLAN DESIGNATION**

Highway Visitor Commercial and Very High  
Density Residential

### **7. ZONING**

Highway Visitor Commercial (CH) and Very  
High Density Residential (RVH)

## **8. DESCRIPTION OF PROJECT**

The property at 100 East Ocean View Drive (APN 018-150-55) is presently split-zoned. Approximately two-thirds of the 0.69 acre parcel has a General Plan Land Use Designation and zoning of Very High Density Residential (RVH) and the remainder is designated and zoned Highway Visitor Commercial (CH). The applicant proposes to alter the designation and zoning of the parcel so that it is completely Highway Visitor Commercial.

## **9. SURROUNDING LAND USES AND SETTING:**

North: Commercial (McDonald's)

South: Commercial (Surf Motel)

East: Vacant

West: Main Street, then Commercial (Emerald Dolphin)

## **10. OTHER AGENCIES REQUIRING APPROVAL**

California Coastal Commission

## PROJECT LOCATION

The project is located in the portion of Fort Bragg east of Main Street and North of Walnut Street, as shown in **Figure 1 – Location Map**). The Inland Land Use and Development Code regulates land use, subdivisions and development for nearly half the City; however, the ILUDC Amendment would only affect areas zoned Heavy Industrial (IH) and Light Industrial (IL).

Figure 1 – Location Map

## ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages:

- |  |   |   |
|--|---|---|
| <input type="checkbox"/> Aesthetics                      | <input type="checkbox"/> Agricultural Resources             | <input type="checkbox"/> Air Quality              |
| <input type="checkbox"/> Biological Resources            | <input type="checkbox"/> Cultural Resources                 | <input type="checkbox"/> Geology/Soils            |
| <input type="checkbox"/> Hazards and Hazardous Materials | <input type="checkbox"/> Hydrology/Water Quality            | <input type="checkbox"/> Land Use/Planning        |
| <input type="checkbox"/> Mineral Resources               | <input type="checkbox"/> Noise                              | <input type="checkbox"/> Population/Housing       |
| <input type="checkbox"/> Public Services                 | <input type="checkbox"/> Recreation                         | <input type="checkbox"/> Transportation/Traffic   |
| <input type="checkbox"/> Utilities/Service Systems       | <input type="checkbox"/> Mandatory Findings of Significance | <input type="checkbox"/> Greenhouse Gas Emissions |

## DETERMINATION

On the basis of this initial evaluation:

- I find that the proposed project COULD NOT have a significant effect on the environment and a NEGATIVE DECLARATION will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

## I. Aesthetics

<i>Would the project:</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Have a substantial adverse effect on a scenic vista?			✓	
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				✓
c. Substantially degrade the existing visual character or quality of the site and its surroundings?			✓	
d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			✓	

**Impacts a-d:** *Impacts are less than significant*

The project is not located in an area mapped as scenic by Coastal General Plan Map CD-1. The proposed amendment does not entitle any physical development and cannot affect trees or rock outcroppings. The subject parcel is vacant and the land use change would not affect historic buildings. Caltrans has not designated either Highway 20 or Highway 1 as a State Scenic Highway; therefore, the project is not visible from a State Scenic Highway.

The project proposes to change the land use designation of a portion of the property from RVH to CH. The table below summarizes the lot coverage and height limit requirements of each designation:

	RVH	CH
<b>Maximum Height</b>	45 ft.	35 ft.
<b>Maximum Lot Coverage</b>	No maximum	0.40 F.A.R.

Changing the portion of the property that is presently RVH to CH would decrease the maximum permitted height and total maximum lot coverage. This reduction in maximums would decrease the allowable potential for visual impact by future development.

Future development would require a Coastal Development Permit (CDP), and would be subject to the visual resource policies in the Fort Bragg Local Coastal Program (LCP), including light pollution policies that address glare. Additional project-specific aesthetic impacts would be identified and mitigated through the CDP and CEQA review of future individual projects.

## II. Agricultural Resources

<i>Would the project:</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				✓
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?				✓
c. Conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production?				✓
d. Result in the loss of forest land or conversion of forest land to non-forest use?				✓
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?				✓

**Impacts a-e:** *No impacts*

The proposed project would be located on a parcel with a split land use designation and zoning as RVH and CH. The RVH and CH zoning districts do not permit forestland agricultural uses. The parcel has not been used for agriculture or subject to any Williamson Act contract. The property is not considered prime farmland, unique farmland or farmland of statewide importance per the Farmland Mapping and Monitoring Program. This project would not result in the conversion of any farmland to non-agricultural uses, and the project would have no impact to farmland.

### III. Air Quality

<i>Would the project:</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Conflict with or obstruct implementation of the applicable air quality plan?			✓	
b. Violate any air quality standard or contribute substantially to an existing or projected air quality violation?			✓	
c. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?			✓	
d. Expose sensitive receptors to substantial pollutant concentrations?			✓	
e. Create objectionable odors affecting a substantial number of people?			✓	

**Impacts a-e:** *Impacts are less than significant*

The proposed project is within the Mendocino County Air Quality Management District Air Basin, which relies on the Bay Area Air Quality Management District's CEQA Guidelines. All of Mendocino County is non-attainment for the State PM10 standard. Future uses would individually require a CDP and environmental review, and any project-specific impacts would require mitigation at that time.

#### IV. Biological Resources

<i>Would the project:</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Have a substantial adverse effect, either directly or through habitat modification, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or US Fish and Wildlife Service?			✓	
b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?			✓	
c. Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?			✓	
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?			✓	
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?			✓	
f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				✓

**Impacts a-e: Impacts are less than significant**

The LCP contains numerous policies aimed at the preservation and protection of biological resources, and this amendment does not seek to modify or eliminate these regulations. These existing policies would apply to future development on the property. Future uses would be individually subject to environmental review, where any project-specific impacts would require mitigation.

No preservation, protection or adopted conservation plans apply to the ILUDC plan area.

## V. Cultural Resources

<i>Would the project:</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?			✓	
b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?			✓	
c. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?			✓	
d. Disturb any human remains, including those interred outside of formal cemeteries?			✓	

**Impacts a-d:** *Impacts are less than significant*

The LCP contains numerous regulations protecting cultural resources. The existing policies will continue to apply to new development. Additionally, future uses would be individually subject to environmental review, where any project-specific impacts would require mitigation.

## VI. Geology and Soils

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
<i>Would the project:</i>				
a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving: <ul style="list-style-type: none"> <li>i. Rupture of known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?</li> <li>ii. Strong seismic ground shaking?</li> <li>iii. Seismic-related ground failure, including liquefaction?</li> <li>iv. Landslides?</li> </ul>			✓	
b. Result in substantial soil erosion or the loss of topsoil?			✓	
c. Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?			✓	
d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code creating substantial risks to life or property?			✓	
e. Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater.			✓	

**Impacts a-e:** *Impacts are less than significant*

Article 17.54 provides adequate regulation to ensure that new development will not be located on unstable, expansive, or otherwise inadequate soils. The California Building Code also regulates construction to ensure that occupants are not exposed to hazards from structures. Future development would be individually subject to environmental review and the existing LCP requirements. Any project-specific impacts would require mitigation.

## VII. Greenhouse Gas Emissions

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
<i>Would the project:</i>				
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			✓	
b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			✓	

**Impacts a-b:** *Impacts are less than significant*

The City of Fort Bragg has adopted a greenhouse gas (GHG) emission reduction target of 7% by 2020, and has prepared a Climate Action Plan and Greenhouse Gas inventory. The proposed Green Building and Energy Conservation measures in the Sustainability Element of the General Plan are intended to help achieve the City’s GHG reduction goal. The proposed land use change does not conflict with the Climate Action Plan. Additionally, future development would be individually subject to environmental review and LCP requirements, where any project-specific impacts would require mitigation.

### VIII. Hazards and Hazardous Materials

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			✓	
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			✓	
c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			✓	
d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				✓
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				✓
f. For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?				✓
g. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?				✓
h. Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				✓

**Impacts a-c:** *Impacts are less than significant*

Hazardous materials could be used during construction activities for future development. Additionally, commercial development may include businesses that utilize chemicals and hazardous materials, and their routine business operations may involve chemicals that are manufactured, warehouse, or transported. However, future uses and development will require a CDP and environmental review where project-specific impacts can be analyzed. Appropriate mitigation would be required at that time to limit any impacts to an insignificant level.

**Impacts d-h:** *No impacts*

A private airstrip exists north of the City boundary, and a helipad operates at the Mendocino Coast District Hospital. The helipad is approximately 0.5 miles away; however, this project proposes no physical development and could not impact public or private air transportation. Future development will require a CDP and environmental review; project-specific impacts will be analyzed and mitigated at that time.

The project is not located within a wildland fire hazard area. It is located in an urbanized portion of the City of Fort Bragg.

The City's Emergency Operations Plan (EOP) has been developed to provide a comprehensive emergency management program for the City. It mitigates the effects of hazards and includes measures to be taken to preserve life and minimize damage, enhance response during emergencies, provide necessary assistance, and establish a recovery system, in order to return the City to its normal state of affairs in case of an emergency. The plan defines preparations and mitigations to respond to the effects of natural disasters including wildfire, technological accidents, nuclear incidents, and other major incidents/hazards. This LCP amendment has no impact on this plan, and future development will be subject to the plan.

## IX. Hydrology and Water Quality

<i>Would the project</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Violate any water quality standards or waste discharge requirements?			✓	
b. Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table (e.g. the production rate of a pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?			✓	
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?			✓	
d. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?			✓	
e. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?			✓	
f. Otherwise substantially degrade water quality?			✓	
g. Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				✓
h. Place within a 100-year flood hazard area structures which would impede or redirect flood flows?				✓

i. Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?				✓
j. Inundation by seiche, tsunami, or mudflow?				✓

**Impacts a-f:** *Impacts are less than significant*

Future development on the parcel would increase stormwater flows; however, the LCP includes numerous regulations that require storm infiltration, treatment and improved conveyance. Future development would be subject to these and other existing policies that mitigate stormwater impacts. Future uses with the potential to cause project-specific stormwater impacts would be subject to mitigation during permit and environmental review of the individual project.

**Impacts g-j:** *No impacts*

The proposed amendment would not be entitled any physical development, and does not directly impact floodways or otherwise affect hydrological hazards.

## X. Land Use and Planning

<i>Would the project</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Physically divide an established community?				✓
b. Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?			✓	
c. Conflict with any applicable habitat conservation plan or natural community conservation plan?				✓

**Impacts a-c: No impacts**

The amendment would alter an existing split-zoned parcel and reclassify it with one land use designation. The change in land use does not divide any established community because 1) the parcel is vacant, and 2) the surrounding land uses are a mixture of vacant and commercial properties. Changing this land use would have no effect on an established community.

Future proposals to develop the property in reliance on this proposed amendment would be reviewed for consistency with applicable plans, policies and regulations through the CDP review process. Project-specific environmental analysis will occur during this review, and any future impacts would need mitigation.

The project has no impact on any applicable habitat conservation plan or natural community conservation plan.

## XI. Mineral Resources

<i>Would the project</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				✓
b. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				✓

**Impacts a-b:** *No impacts*

The project site does not have any known locally important mineral resources. Therefore, development in compliance with the LCP would not result in the loss of known mineral resources, nor conflict with mineral resource recovery or processing facilities.

**XII. Noise**

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
<i>Would the project</i>				
a. Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			✓	
b. Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?			✓	
c. A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?			✓	
d. A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?			✓	
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				✓
f. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?				✓

**Impacts a-d:** *Impacts are less than significant*

Chapter 9.44 of the Fort Bragg Municipal code regulates noise in the City of Fort Bragg. This land use amendment would have no impact on this chapter. However, future uses in compliance with the proposed amendment would have the potential to create noise. Future uses would subject to the existing regulations, and should impacts be significant, project-specific mitigation would be required to reduce impacts to an insignificant level.

**Impacts e-f:** *No impacts*

A private airstrip exists north of the City boundary, and a helipad operates at the Mendocino Coast District Hospital. This project proposes no physical development and could not impact public or private air transportation. Future development will require a CDP and environmental review; project-specific impacts will be analyzed and mitigated at that time.

### XIII. Population and Housing

<i>Would the project</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				✓
b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				✓
c. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				✓

**Impacts a-c:** *No impacts*

The proposed amendment would convert less than a half acres of land designated RVH to CH. This would result in the loss of land designated for residential development, and would not induce substantial population growth. The subject parcel is vacant, and the change in land use would not displace any housing or people. The project has no impact on population and housing.

#### XIV. Public Services

*Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:*

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Fire protection?			✓	
b. Police protection?			✓	
c. Schools?			✓	
d. Parks?			✓	
e. Other public facilities?			✓	

**Impacts a-e:** *Impacts are less than significant*

The existing LCP contains numerous regulations addressing public services. The proposed amendment preserves all existing policies relating to public services, and future development would be subject to project-specific environmental and permit review. Any potential project-specific impacts would require mitigation; however, this amendment will have a less than significant impact on public services.

**XV. Recreation**

<i>Would the project</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				✓
b. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				✓

**Impacts a-b:** *Impacts are less than significant*

This LCP land use amendment does not propose any physical development that would require increased park use or increased recreational facilities. The proposed amendment does not convert any existing park or open space area to a new use, and affects no policies requiring the development of future parks or open space areas.

## XVI. Transportation/Traffic

<i>Would the project</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?			✓	
b. Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?				✓
c. Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?				✓
d. Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			✓	
e. Result in inadequate emergency access?			✓	
f. Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?				✓

**Impacts a:** *Impacts are less than significant*

The LCP amendment is consistent with the existing General Plan policies pertaining, but not limited to, intersections, streets, highways and freeways, pedestrian and bicycle access, and transit. Future projects in compliance with the LCP will be subject to additional permit and environmental review, and would require mitigation for any impacts associated with specific projects.

**Impacts b-c:** *No impacts*

The LCP amendment does not conflict with the *Mendocino Council of Governments Regional Transportation Plan* because the project does not affect regional-serving roads. Additionally, development pursuant to the LCP would not change air traffic patterns, increase air traffic levels or result in a change in location that would result in substantial safety risks.

**Impacts d-e:** *Impacts are less than significant*

Existing streets are generally wide and interconnect in a grid pattern to facilitate emergency vehicle access. This amendment does not alter or affect existing circulation; however, future land uses in compliance with the LCP would be subject to project-specific permit and environmental review, which may require mitigation measures if impacts are found to be significant.

**Impacts f:** *No impacts*

This amendment does not conflict with the Bicycle Master Plan, General Plan or any other plans.

## XVII. Utilities and Service Systems

<i>Would the project</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?			✓	
b. Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			✓	
c. Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			✓	
d. Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?			✓	
e. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			✓	
f. Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?			✓	
g. Comply with federal, state, and local statutes and regulations related to solid waste?			✓	

**Impacts a-g: Impacts are less than significant**

Development consistent with this amendment would increase sewer flows depending on the nature of future projects. The City's sewer treatment plant can accommodate additional flows. Additionally, adoption of the amendment will have less than significant impacts on the need for additional stormwater conveyance facilities.

Development reliant on the LCP amendment would increase water use and solid waste generation slightly, and would place few additional demands on existing water service capacities or storage. The LCP includes additional policies and programs to reduce water use and solid waste generation, This amendment would not affect the existing policies.

### XVIII. Mandatory Findings of Significance

<i>Would the project</i>	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?			✓	
b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?			✓	
c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?			✓	

**Impacts:** *Impacts are less than significant*

Several plant and animal species listed as threatened by the state or federal government are known to exist in the general vicinity of the project. Protection of sensitive communities and species are important for long-term ecological diversity and sustainability. The LCP includes regulations to protect and preserve valuable resource areas, and these existing policies are not affected by the proposed amendment.
