- A. Review Design Options for Park Pavilion and Make Recommendation to City Council to Authorize Consultant to Proceed with Construction Documents for Bainbridge Park Enhancement Project

Assistant Director Chantell O'Neal gave a brief overview of the project and introduced Patrick from Melton Design Group who is the design consultant for the project.

Patrick discussed the significance of the Bainbridge Park Master Plan and its relevance to today's conversation. He then presented four potential pavilion locations, with two size options, highlighting the advantages and disadvantages of each site. Additionally, he provided a sun path analysis for each location. Patrick also explained how the pavilions would fit into the overall park design, including their integration with adding additional picnic tables.

Discussion: Committee Member Peters expressed his approval of the middle location pavilion option one in the larger size and elaborated on why he believes that would be the best location

and size.

Committee Member Albin-Smith explained while she does favor the location of option four she would prefer to see an option that is round instead of square and is more centrally located in the lawn area. She also expressed she is not in favor of the tiled look to match the Veterans building and would prefer to see something with redwood.

Committee Member Peters summarized that while the committee members may not agree on location and design they both agree that we need a pavilion in Bainbridge Park and recommended taking the discussion back to City Council.

City Manager Isaac Whippy inquired about the height of the stage and what is located behind. Patrick explained the options for backdrops and height.
