Response to Comments from Appeals to the Coastal Commission

Response to comments from Paul Clark (PC) Appeal. The numbers in the left-hand column refer to subsequent paragraphs in the appeal (Attachment 3), and the responses on the right either direct the reader to specific [pages of the 3-24-2025 staff report, the 9-11-2025 Staff Report or provides direct response. The term of art "Comment Noted" indicates that the paragraph or section of the appeal does not include and specific information that requires a response,

Comment	Response
# PC-1	The proposed residential units are not leasted "up on the water" "Demi-
PC-1	The proposed residential units are not located "upon the water". "Barrier
	of bedrooms" is not a use type in our zoning code and does not

PC-2	buildings with views between them to the ocean. See the analysis of the project compliance with Land Use Regulations
F <b>U-</b> 2	Page 5 through 6. See also the Density Bonus Law analysis starting on
	page 17 through Page 20. This issue has been addressed in the revised
	project description.
PC-3	See comment for PC-2 above.
PC-4	Comment noted.
PC-5	Comment noted.
PC-6	Comment noted.
PC-7	Please see the visual analysis section of the City Council staff report
	dated 3-24-2025. As clearly described in the staff report this distant
	highly filtered coastal view is not protected by the City's certified LCP.
	Please see the Visual Resources analysis of the Staff Report Dated 3-24-
	2025 pages 25-29.
PC-8	The appellants visual of the impact of the project on coastal views is not
	an illustration of the project on site and is irrelevant to this project as
	these elevations are in a generic location. They do not illustrate potential
	impacts to costal views. Please see the elevation illustration Figure 8 in
	the Staff Report Dated 3-24-2025 which illustrates the retention of the
	best views to the ocean through the project.
PC-9	Code Section 65589.5 does apply to this project. Gov Code 65589.5(j)
	applies to all housing projects with less than 20% of units affordable to
	low and moderate income households (e.g. the proposed project).
	(j) (1) When a proposed housing development project complies
	with applicable, objective general plan, zoning, and subdivision
	standards and criteria, including design review standards, in effect
	at the time that the application was deemed complete, but the
	local agency proposes to disapprove the project or to impose a
	condition that the project be developed at a lower density, the local
	agency shall base its decision regarding the proposed housing

	<ul> <li>development project upon written findings supported by a preponderance of the evidence on the record that both of the following conditions exist:</li> <li>(A) The housing development project would have a specific, adverse impact upon the public health or safety unless the project is disapproved or approved upon the condition that the project be developed at a lower density. As used in this paragraph, a "specific, adverse impact" means a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete.</li> <li>(B) There is no feasible method to satisfactorily mitigate or avoid the adverse impact identified pursuant to paragraph (1), other than the disapproval of the housing development project or the approval of the project upon the condition that it he developed at a proval of the project or the approval of the project upon the condition that it he developed at a proval of the project or the approval of the project upon the condition that it be developed at a proval of the project upon the condition that it be developed at a proval of the project upon the condition that it be developed at a proval of the project upon the condition that it be developed at a proval of the project upon the condition that it be developed at a proval of the project upon the condition that it be developed at a proval of the project upon the condition that it be developed at a proval of the project upon the condition that it be developed at a proval of the project upon the condition that it be developed at a proval of the project upon the condition that it be developed at a proval of the project upon the condition that it project or the proval of the project upon the condition that it project upon the condition that is proval of the project upon the</li></ul>
	approval of the project upon the condition that it be developed at a lower density. This is the standard referenced at the Public Hearing. The Planner was not referencing that portion of the code that applies only to affordable housing projects but rather she referenced that portion of the government code that applies to ALL housing projects 65589.5(j).
PC-10	The findings sections of City Council's resolution refers to the entire staff report and all attachments for each development permit. The Staff Report provides more than adequate evidence in the record to support City's Council's findings for the Coastal Development Permit, Use Permit, Design Review Permit, Sign Permit and CEQA exemptions.
PC-11	Section 15192 does apply to projects that rent at least 5% of units to very low-income households. This proposed project complies with that standard. Eight of the 83 units will be rented to very low-income housing. See the Housing Infill Exemption analysis on Page 35 of the staff report dated 6-11-2025.
PC-12	Comments noted and already responded to see responses for PC-8, PC- 2. Mission statements are not regulatory. Only General Plan policies are regulatory. From Section F of Chapter 1 of the Coastal General Plan which defines the purpose of a Policy: "Policy: A <i>specific mandatory</i> <i>statement binding the City's action and establishing the standard of</i> <i>review</i> to determine whether land use and development decisions, zoning changes or other City actions are consistent with the Coastal General Plan."
PC-13	This issue has already been addressed in the staff report and in this response to comments. See the analysis of the project compliance with Land Use Regulations Page 5 through 6. See also the Density Bonus

Law analysis starting on page 17 through Page 20. This issue has been addressed in the revised project description.PC-14This policy was extensively addressed in the Staff Report Dated 3-24- 2025 see pages 33-37 regarding service capacity and pages 22-24 of th Staff report dated 6-11-2025. The proposed project would not reduce service capacity in any meaningful way. The City has more than enough service capacity to serve existing, authorized and probable priority uses. All existing uses are adequately served with existing services. The only authorized and proposed priority uses in the Coastal Zone include the Noyo Center for Marine Sciences (a small marine research facility with limited water needs), a fire station replacement project which will not add to water demand, and the establishment of a dance hall. Even if these uses are combined with this proposed mixed use project, they will not even begin to exceed the City's current capacity to provide services.PC-15The proposed project complies with this policy as it includes commercial activities (hotel suites and a retail store) in conjunction with residential uses.PC-16Please see the public access discussion in the Staff Report dated 6-11- 2025 pages 21-22 and the response to Policy LU-5.3 on the bottom of page 6 of the staff report dated 6-11-2025.PC-17Comment noted.
