Subject: public comment item 5d, Approve Letters in Opposition to AT&T's applications to CPUC
Date: Monday, March 11, 2024 2:33:32 PM

Dear City Council members,

Re: Approve City Council Letters in Opposition to AT&T CPUC Applications
A.23-03-002 and A.23-03-003

I appreciate that you are sending these letters along with call flows maps to the CPUC, as well as McGuire & Wood. I have participated at the Ukiah and the Santa Cruz gathering with CPUC and AT&T representatives. I heard many people express their fear that losing landlines would make it impossible for them to live with, do to their sensitivity to Electromagnetic Fields (EMF's) I am hoping that you can add a sentence about that. Your letter unfortunately did not include the health reasons mentioned by many during these gatherings, as well as in other gatherings and online at the CPUC web page. Having no more landlines would increase cell towers, cell phones, electromagnetic radiation. That is impossible for people with radiation poisoning to tolerate. That # is steadily growing. Please add a sentence referring to health reasons.
Thanks, Annemarie Weibel
