

PETITION TO STOP THE

JACKSON PYGMY FOREST DUMP

We the undersigned are opposed to the development of a solid waste (garbage) transfer station on 17 acres of rare Pygmy forestland along Highway 20. Now managed by Jackson Demonstration State Forest for the State of California, the proposed development is located at the gateway to the Mendocino coast. It is expensive (over \$5,000,000) and will adversely affect traffic and tourism, spread roadside litter, violate community aesthetics, and present a potential risk to the Fort Bragg water supply. There are other better, less expensive, more environmentally-friendly alternatives. Come to the 2 p.m. Scoping Session on Wed., Feb. 19th at FB Town Hall to learn more.

**PETITION TO STOP THE
JACKSON PYGMY FOREST DUMP**

We the undersigned are opposed to the proposed development of a solid waste (garbage) transfer station site on 17 acres of rare Pygmy forest land along Highway 20 now managed by the Jackson Demonstration State Forest for the State of California. This development located at the gateway of the Mendocino coast is too expensive (FIVE MILLION DOLLAR), will adversely affect traffic, roadside litter, community aesthetics, and present a potential risk to the Fort Bragg water supply. There are other better, less expensive and more environmentally-friendly alternatives.

**PETITION TO STOP THE
JACKSON PYGMY FOREST DUMP**

We the undersigned are opposed to the development of a solid waste (garbage) transfer station on 17 acres of rare Pygmy forestland along Highway 20. Now managed by Jackson Demonstration State Forest for the State of California, the proposed development is located at the gateway to the Mendocino coast. It is expensive (over \$5,000,000) and will adversely affect traffic and tourism, spread roadside litter, violate community aesthetics, and present a potential risk to the Fort Bragg water supply. There are other better, less expensive, more environmentally-friendly alternatives. Come to the 2 p.m. Scoping Session on Wed., Feb. 19th at FB Town Hall to learn more.

REC'D MAR 18 2015

Cherry Cove Ranch
March 18, 2015

Dear Dave,

I hope you will reconsider
your vote on the transfer station.
There is a distinct possibility that
the Pinery forest will hold in the
water for a longer period than normal
land.

The pollutants will find there
way into the Fort Bragg water
system.

It will cause cancers and other
diseases. The water will be drunk
by your grand children.

Yours truly

Charles Thorbecke

REC'D MAR 18 2015

Dear Mr. Cimolina

the Piny forest absorbs water
for a long time. It will not
be mitigated by holding the water
in tanks for 24 hours.

the water in the piny could
stay for a week or longer.

the poisons could flow into
Fort Briggs' water supply.

The irony is Ft Briggs' return
would poison their own water supply

yours truly

Charles Thorbecke

REC'D MAR 18 2015

Cherry Cove Ranch

March 14, 2015

Scott Dietz

Dear Mr. Dietz

I believe the Mendocino County
General Plan has a Policy that
States new business should be
located in an existing structure that
is compliant with the zoning.
Therefore the Transton Station should
be located at Pudding Creek
Waste Management. Why should we build
a new structure in a new site
when there is already a site available

Yours truly

Charles Thorbecke

Cherry Cove Ranch
March 18, 2015

REC'D MAR 18 2015

Dear Mr. Hammerstrom,

I hope you will reconsider your
vote on the Transfer Station.

We have 2,000 acres of Pinyon Forest
in the world. It is here in Mendocino County.

The properties of the Pinyon are
such that it will absorb rain water
and run off and keep it as much
as a week or longer.

This will mitigate the EIR plan
of storing water for 24 hours.

The run off will go into Fort Bragg's
water supply.

This is a high price to pay
for "Free Land"

yours truly
Charles Thorbecke
