RE: Segway

The use of Segways on the coastal trail is not a good idea.

- 1) Public money was used to develop the paved paths. Public money is being used to maintain them. Is it ethical for a business to profit so directly from public expenditure?
- 2) It seems that the city of Fort Bragg might be held liable for any accidents that may occur due to the use of Segways on the public trails. Is this a potential risk for a lawsuit? Might it have some impact on the cost of liability insurance for the city?
