

Fed Wildlife is DEAD Wildlife

California Ground Squirrel

Common Raven

When **YOU feed** these animals, you:

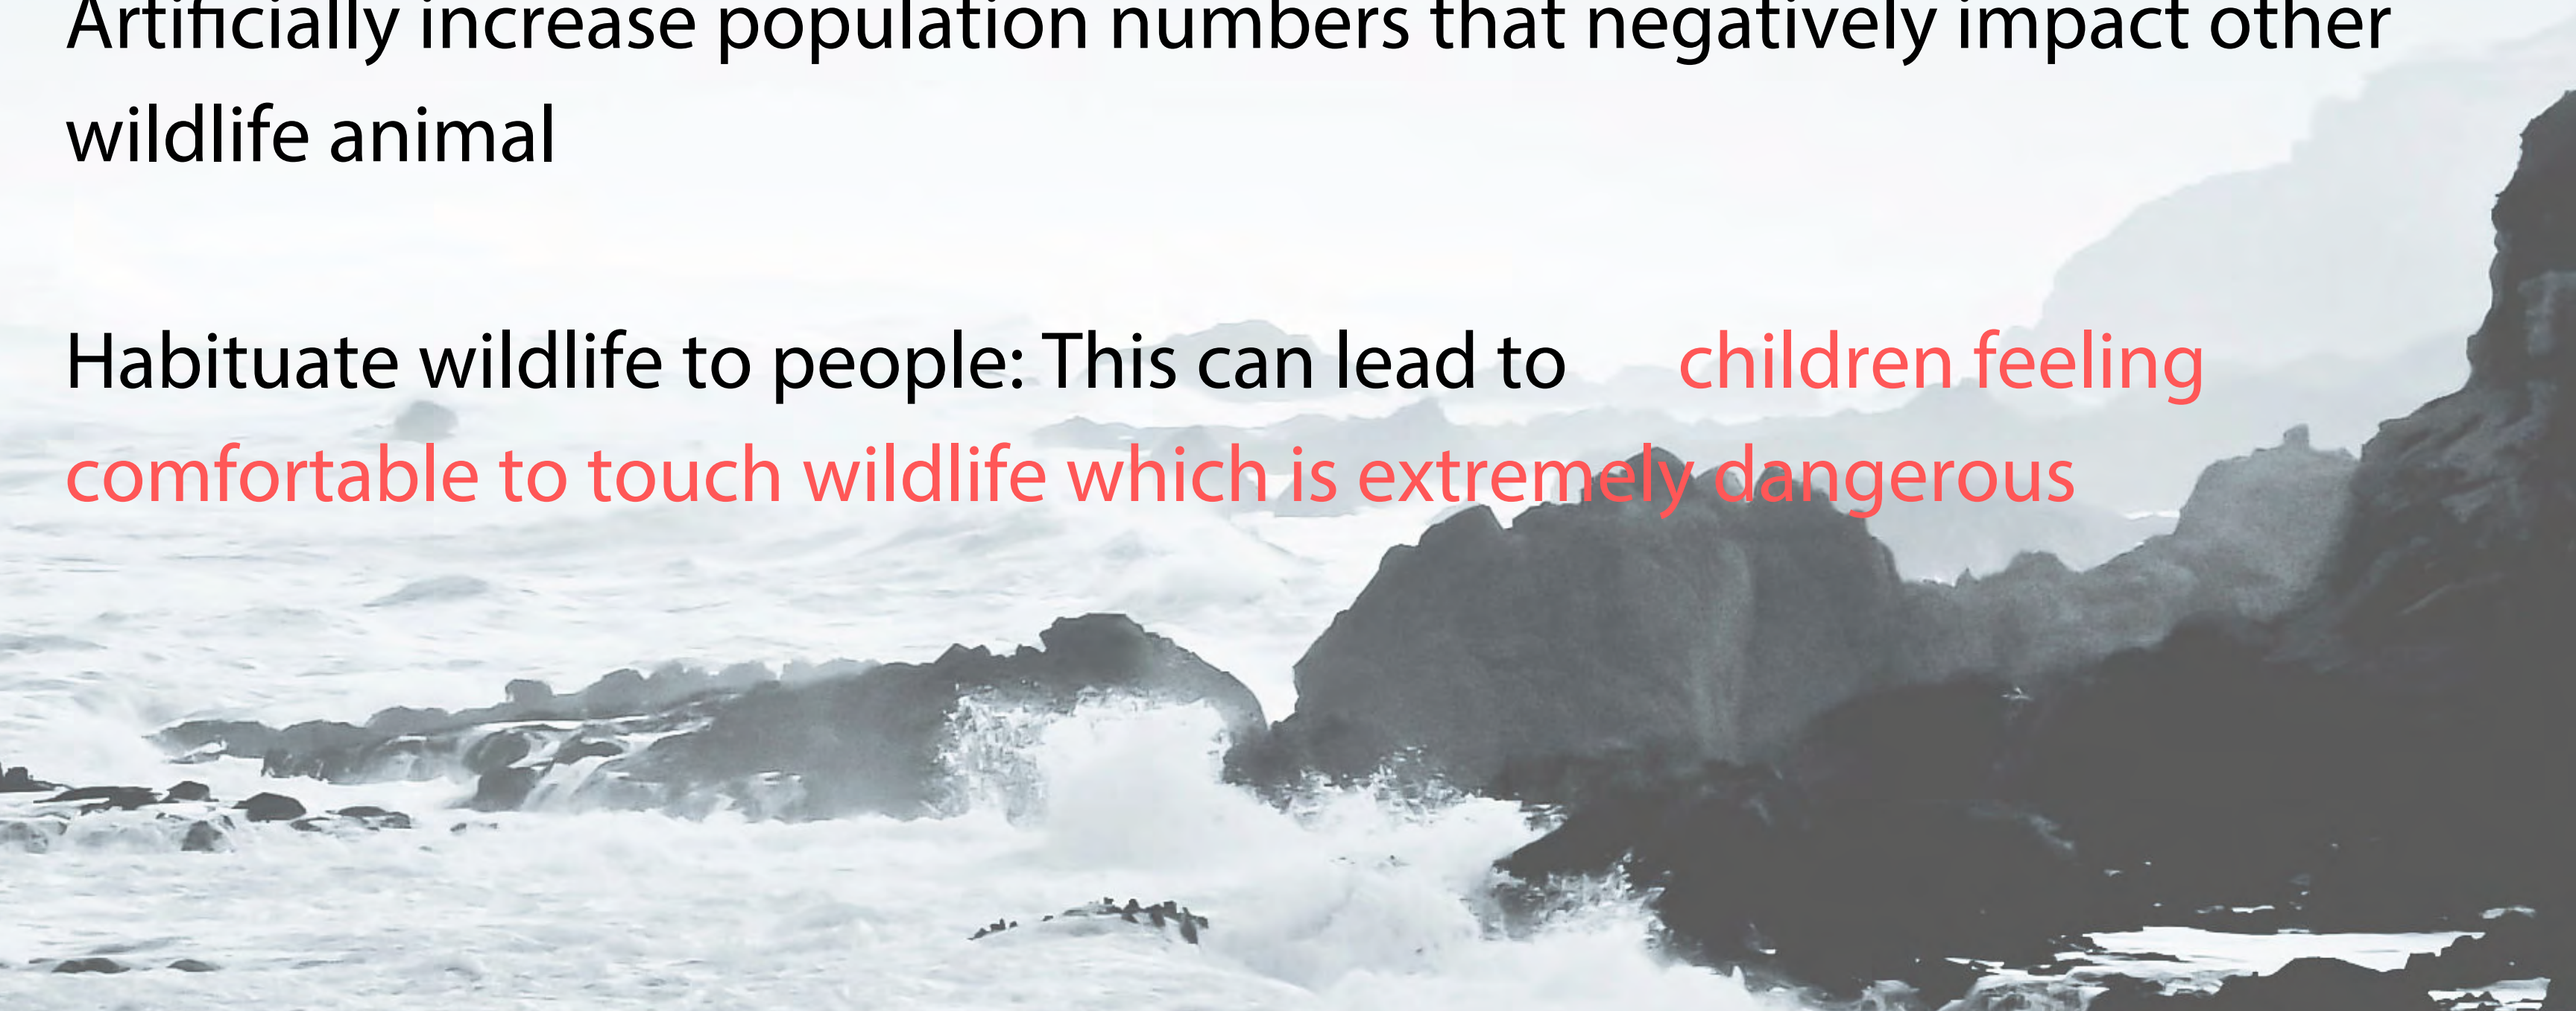

Weaken an animal's capacity to find natural and reliable food sources

Risk yourself or your pet getting a disease

Encourage aggressive behaviors from wildlife towards people for food

Artificially increase population numbers that negatively impact other wildlife animal

Habituate wildlife to people: This can lead to **children feeling comfortable to touch wildlife which is extremely dangerous**

Feeding these animals will compromise this habitat,
PLEASE help us in protecting this area and its' visitors
